

TIME FOR **YOU**

IT'S TIME FOR **YOU**

The time you spend in your bathroom should be about a moment of peace. This is our philosophy at Copenhagen Bath and the reason we offer not only great functionality, but also a mentally quiet and characteristically simple Scandinavian design.

Our unique patented Acovi® solid surface is a massive yet adaptable material that can be cast, shaped and even cut very thinly. This gives us amazing possibilities when creating beautiful bathroom furniture. It is pore-free and can withstand the test of time and splashing water. This makes it perfect for a wide range of products like wash basins, bathtubs, cabinets and shelves that Copenhagen Bath offers.

We even produce our designs in custom measurements to create your dream bathroom.

You now hold our new catalogue in your hands, so put your feet up, spend some time on yourself and get inspired and seduced by our many beautiful designs and collections.

A photograph of a beach with a rock formation and waves. The foreground shows a pebbly beach with a small rock formation consisting of a larger, light-colored rock with a smaller, darker, teardrop-shaped rock balanced on top. To the left, white foam from a wave is visible. The background shows the ocean and a hazy sky. The text 'AIR' is in the upper right, followed by a paragraph of text.

AIR

The crisp air along the
Scandinavian coast
can make you feel
brand new again,
like when you're fresh
out of the shower.

ACOVI® SOLID SURFACE

The Acovi® solid surface by Copenhagen Bath is an outstanding quality material containing natural minerals.

With its unique durability and a very smooth and pore-free surface, the Acovi® solid surface is perfectly suited for bathroom furniture such as bathtubs and wash basins. In contrast to other materials like porcelain and marble, the Acovi® excels in its warm, silky smooth surface that brings a pleasant kind of luxury to the bathroom of your dreams. You can choose your new wash basin from Copenhagen Bath with or without a tap hole. Therefore, both wall and deck mounted tap ware are a suitable match to our products.

Reasons why you should choose Acovi® solid surface:

- Easy to maintain with most cleansing agents
- Absolutely pore-free and very smooth surface
- Lime scale doesn't adhere easily
- Does not contain natural stone and therefore tolerates most toxic cleansing agents and descaler
- Personal care products and make-up do not spoil the surface
- Very durable
- Minor damage can easily be repaired
- 100% water resistant

YOUR OWN DESIGN

Our simple dream is that,
your bathroom dreams are fulfilled.

When designing your new bathroom, pre-made products don't always suit your needs. That's why we at Copenhagen Bath can help you by making most of our product range in bespoke sizes.

Bathtubs and products which are cast in moulds can't be ordered bespoke; these products are only available as standard sizes.

If you have your own design, we can probably help! Either contact one of our showrooms or our office direct and we will help you with your request.
