

TQ5 bathtub is the fourth bathtub designed by Danish award winning designer Mikal Harrsen for Copenhagen Bath.

His usual minimalistic and clean design makes it an instant classic in the international respected Scandinavian style. Sharp lines form the outside of the TQ5 where soft and organic shapes on the inside makes it a comfortable and relaxing experience using the bathtub.

Made from matte white solid Acovi® composite, the bathtub is extremely robust and durable. The pore free surface makes it very easy to clean and maintain.
